

# A cheap and easy to build air aid shelter

You will need...  
A spade  
A screw driver  
A hammer  
Coragated metal  
And two packets of vegetable  
seeds.

1. First of all dig a hole depending on how big the family is.
2. Then place a sheet of corrugated metal in the shape of a arch in the front of the square
3. After that take the drain pipe and attach it to the building .
4. Now place the door a few inches away from the drain pipe.
5. After that take a ladder and attach a sheet of bent corrugated metal and place it on the top of the building
6. Go in to the shelter and cut out some of the corrugated metal each side of the door.
7. Now get some dirt and cover it on the top of the shelter.
8. Now take the vegetable seeds and plant them on the top of the shelter.
9. You have now finished your air aid shelter
